EDUCATION

BS Software Engineering

Virtual University of Pakistan

04/2019 – 04/2023 | Lahore, Pakistan

SKILLS

- React Js
- Html
- React Query
- Css
- Material UI
- Javascript
- Context API
- Redux
- React Testing Library
- 3rd Party Integrations
- Node Js
- Express Js
- Mongo DB

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer

Devtech Fusion

02/2025 – Present

Lahore, Pakistan

Accomplished Senior Front End Engineer with extensive experience in building scalable, high-performance web applications. Expert in modern JavaScript frameworks, UI/UX implementation, and leading front-end architecture decisions while mentoring development teams.

Key Responsibilities

- Led front-end development initiatives and defined coding standards across multiple teams.
- Mentored developers through code reviews, pair programming, and technical guidance.
- Translated UI/UX designs into responsive, pixel-perfect interfaces using modern frameworks.
- Optimized application performance, achieving sub-2-second load times and 90+ Lighthouse scores.
- Built scalable component architecture and implemented robust state management (Redux, React Query).
- Integrated RESTful APIs and GraphQL with strong error handling and fallback patterns.
- Supported hiring by conducting technical interviews and evaluating candidates.

Key Impact: Improved development velocity by 30% and reduced production bugs by 40% through structured guidelines and testing practices.

Software Engineer

Hazelsoft

07/2024 – 02/2025

Lahore, Pakistan

Detail-oriented software engineer with expertise in full-stack development and problem-solving. Proficient in designing, developing, and deploying scalable software solutions using modern technologies and best practices.

Key Responsibilities

- Developed and maintained full-stack applications across the entire software lifecycle.
- Wrote clean, well-documented code and collaborated with designers, PMs, and QA teams.

- Participated in Agile processes including sprint planning, daily stand-ups, and retrospectives.
- Performed code reviews, resolved bugs, and optimized application performance.
- Implemented automated testing (unit, integration, E2E) and integrated third-party APIs.
- Managed version control with Git and contributed to technical documentation.

Web Developer

01/2022 – 06/2024

Metalogix Tech

Enthusiastic and motivated web developer with strong foundation in HTML, CSS, JavaScript, and modern frameworks. Eager to contribute to innovative projects while growing technical skills in a collaborative environment.

Key Responsibilities

- Built and maintained responsive websites using HTML, CSS, JavaScript, and React.
- Assisted senior developers in implementing features and resolving issues.
- Ensured cross-browser compatibility and performed thorough testing.
- Used Git/GitHub for code management and collaborated on technical documentation.

PROJECTS

e Raseed FBR

12/2025 – 01/2026

Designed and developed e-Raseed, a next-generation digital invoicing module enabling businesses to achieve 100% automated compliance with FBR regulations. The system integrates seamlessly with FBR POS, invoice verification services, and sales tax validation APIs to ensure every transaction is securely captured, verified, and stored in real time.

Key Contributions & Features:

- Implemented real-time FBR POS integration for compliant invoice generation and reporting
- Built automated invoice and sales tax verification to eliminate manual validation
- Ensured secure data storage and audit readiness aligned with regulatory standards
- Designed the system to support multiple business domains (retail, wholesale, pharmacy, food outlets, and services)
- Optimized workflows to reduce operational overhead and human error

Outcomes & Impact:

- Achieved full regulatory compliance without manual intervention
- Reduced invoicing and reporting errors significantly
- Improved transaction processing speed and operational efficiency
- Enabled businesses to pass audits confidently with verified digital records

Hotel Pulse

10/2025 – 11/2025

Worked on Hotel Pulse, a platform that collects data from registered hotels and provides competitor comparisons to support business decisions.

Key responsibilities:

- Collected inputs from registered hotels
- Built competitor comparison reports
- Created dashboards for performance insights
- Implemented secure data access
- Supported filtering by location and hotel category

Outcomes:

- Helped hotels compare performance with competitors
- Improved pricing and market positioning decisions

- Reduced manual competitor analysis effort

DevPos [↗](#)

03/2025

Enterprise ERP with POS, B2B Sales & Reporting

- Developed an integrated ERP platform featuring POS, B2B sales management, and advanced reporting.
- Built POS module with inventory tracking, payment processing, receipt generation, and real-time stock updates.
- Implemented B2B features including bulk orders, client-specific pricing, credit terms, quotations, and order tracking.
- Created dashboards for sales analytics, inventory summaries, revenue tracking, and customer insights.

Bayview Shores [↗](#)

07/2024 – 01/2025

Real Estate Platform with Agent Subscriptions & Buyer Matching System

- Built a two-sided platform connecting agents and buyers with intelligent property recommendations.
- Integrated Stripe for agent subscription payments and access control.
- Developed property listing modules with images, descriptions, pricing, and filters.
- Implemented buyer onboarding surveys powering a smart recommendation engine.
- Added property comparison, advanced search, and direct communication features.

Vission [↗](#)

12/2023 – 06/2024

Role-Based Consulting Platform with Three Portals

- Designed Admin, Delegate, and Client portals with role-based access controls.
- Developed tools for project management, client communication, and task tracking.
- Enabled real-time visibility for clients with secure document sharing and progress updates.
- Improved workflow efficiency through integrated multi-role collaboration features.

Done

02/2023 – 12/2023

Task, Project & Workspace Management System

- Built a productivity platform with task creation, deadlines, priorities, and status tracking.
- Implemented project milestones, timelines, resource allocation, and progress monitoring.
- Developed team-based workspaces supporting collaboration and communication.
- Added real-time tracking, file sharing, and customizable dashboards for performance insights.

LA Moving Star [↗](#)

06/2022 – 01/2023

Transport & Moving Services Management System

- Created a multi-portal system for Admin, Company, Client, Salesman, and Foreman roles.
- Developed features for fleet and crew management, scheduling, quotes, and lead tracking.
- Implemented route optimization, inventory handling, billing, and customer feedback workflows.
- Enabled real-time move tracking and seamless coordination across all roles.

Admin Panels

01/2022 – 06/2022

Modular Admin Systems for In-House Applications

- Built multiple dedicated admin panels tailored to individual application requirements.
- Implemented dashboards, user management, permissions, and configuration tools.

- Added real-time monitoring, reporting features, and data management tools.
- Ensured optimized workflows through purpose-built interfaces for each system.
